

Portable floor stand for displays up to 70 kg (154 lbs)  
 Fits displays with VESA sizes up to 600 x 400 mm  
 For 31-85" Displays subject to VESA pattern and weight limit  
 Display rotates through 90°  
 Height adjustable at time of assembly  
 3" wheels  
 Shelves included

The F18 is a top-tier floor stand designed with cast and extruded aluminum, ensuring excellent sturdiness. It provides a high level of adjustability with options for tilt, height adjustment, and rotation. The premium materials make it perfect for applications that demand nothing but the best.

This cart is tailored for AV integrators and resellers who prioritize top-notch craftsmanship and attention to detail in their high-quality work.

### SWL 70 kg (154 lbs)

The strong frame can support displays weighing up to 70 kilograms. For even heavier displays, opt for the VFM-F19 model.

### 37-85" Displays

The recommended size range is determined by both the display's weight and the dimensions of its mounting holes. Any display weighing less than 70 kg and featuring a VESA pattern of up to 600 x 400 mm can be accommodated.

### Rotate to Portrait

Grab the screen and rotate it – this cart is ideal for interactive displays like the Samsung Flip, which automatically re-orientates the screen to portrait-style when you turn it.

### Big Wheels

The cart is equipped with four 3" (75 mm) locking castors that effortlessly glide over bumps, making it easy to pull, even on deep carpet. Unlike many floor stands with only two locking castors, this design offers enhanced stability, especially on slopes.

### Adjustable Height

The VESA assembly on this stand is adjustable, allowing it to slide up and down the column. Once you find the desired height, you can lock it securely in place. If the display is already mounted on the stand, it is recommended to have two people supporting the display while making adjustments.

### Tilt

You can tilt the display 5° upwards and 12° downwards to optimize the viewing angle. This feature is especially beneficial for young children in a classroom setting or to prevent glare from ceiling lights.

### Shelves Included

The cart comes with two shelves: one positioned above the display for a video conference camera and another below the display for laptops or other devices. Both shelves are height adjustable, providing flexible and convenient setup options.

### Cable Management

Complete the job properly; once the display is in place, the cables can be hidden, resulting in a clean and tidy overall appearance.

### D Handle

The cart features a large D-shaped handle on the column, ensuring effortless maneuverability.

## Fast Assembly

We've made sure to design the packaging in a way that minimizes its size, and we've kept the number of parts to a minimum for easy assembly. You'll be up and running in no time!

## SPECIFICATIONS

### PACKAGED DIMENSIONS

895 x 595 x 265 mm / 35.2"x 23.4"x 10.4" (length x width x height)

### PRODUCT WEIGHT

23.3 kg (51.4 lbs)

### PACKAGED WEIGHT

26.2 kg (57.8 lbs)

### SAFE WORKING LOAD (SWL)

70 kg (154 lbs)

### SHELF SAFE WORKING LOAD

5 kg (11 lbs)

### CONSTRUCTION MATERIAL

Aluminium, Cast Alloy

### COLOUR

Matt Black Power coating
