Heavy-duty floor stand

Fixes to wall, transfers load to floor

Supports up to 95 kg (209 lb)

800 mm / 31.5" height adjustment, non-motorised

[Note: once installed the height cannot be adjusted]

Do you trust the wall enough to securely hold a heavy interactive flat panel? With Vision's F51 floor stand, you can say goodbye to those worries. This floor stand ensures that the weight is transferred to the ground, making the installation process easier and safer.

The F50 features height adjustment, so during assembly you can set the height depending on the application. In a big room distant audience members can enjoy a clear view of the presentation over the heads of the crowd. Or you can lower it for young children to engage with the interactive display comfortably in a learning environment. The F51 stand brings convenience and adaptability to your presentations and educational settings.

SWL 95 kg (209 lbs)

The F51 utilizes heavy-gauge components to support the display's weight.

Highly Adjustable Wall Brackets

Two brackets attach the lower part of the F50 to the wall. These brackets allow you to secure the column either almost flush to the wall or standing out from the wall to allow cable channels to pass behind.

Feet or Fixed

Adjustable feet make levelling adjustment simple. Or remove the feet and fix the column to the floor.

Hide Mess

The front cover is removable, facilitating cable routing. And you can conceal source devices or power distribution boards inside the column.

VESA 800 x 600

This stand includes Vision's heavy-duty 800x600 wall mount, which fits most large-format flat panels from 47-100" subject to VESA pattern and weight limit. Vision's other heavy-duty wall mounts (VFM-W4X4, VFM-W6X4, or VFM-W10X6) also fit the F50 stand.

And for smaller displays even Vision's smaller VESA 200x200 (VFM-W2X2TV2) or 100x100 (VFM-W1X1TV2) mounts can be fixed to the F51.

Landscape or Portrait

All of these VESA mount options support portrait or landscape orientation.

800 mm / 31.5" Height Adjustment

The height of the display can be altered during assembly to suit the audience.

Compatible with Surface Hub

Spacers are included to work with the 85" Microsoft Surface Hub.

Optional VC Shelf

Vision provides a range of convenient accessories, including a laptop shelf (VFM-WLS) and a video conference camera shelf (VFM-WVC/2).
