vav.link/vss-2

Maintain correct posture
Two size options: small and medium
Quality Aluminium Construction
Tablet slot integrated

Vision's Sit-Stand (VSS) risers sit on existing desktops and allow companies to fulfil their workplace health and safety obligations to employees without having to swap out the whole desk.

Computer users can work in an ergonomically safe position, moving between a sitting and standing position as often as they need throughout the day to improve muscular mobility and circulation. Ultimately they stay comfortable as they work, increasing productivity and wellbeing.

Narrow Base

The base of the VSS-2 has a narrow footprint for applications where desk space is at a premium. As such it has slightly less height adjustment than the VSS-1 model.

Small

The top platform on the small model measures 680 mm (26.8") wide x 520 mm (20.5") deep, with a keyboard platform which is 680 mm (26.8") wide and 215 mm (8.5") deep.

Medium

The top platform on the medium model measures 800 mm (31.5") wide x 520 mm (20.5") deep, with a keyboard platform which is 680 mm (26.8") wide and 215 mm (8.5") deep.

Height Adjustment

A gas strut assists in moving the platform up and down smoothly. Both the small and medium models have the same height range of 170-430 mm (6.7-16.9").

Scratch Resistant

The display and keyboard platforms are made from non-marking material.

Tablet Slot

The top shelf has an integrated slot near the front edge to support iPads and tablets.

Display Fixings

A hole at the back of the top shelf is available to fix Vision's display mounts quickly and safely, instead of having to use the clamps.

Tilting Adjustment

The keyboard has 8° of tilt movement up and down to maximise ergonomics.
