**VISION**  
Product Catalogue

**Vision** is a leading manufacturer of audio visual components, control products and accessories. Our team is dedicated to providing technical, reliable and smart products for AV installers that are best in class and brilliant value for money.

Established and run by a team of engineers with extensive experience of audio visual installations, our portfolio includes meeting room systems, stands, audio solutions, connectivity and brackets for the leading display products and clever solutions for education, corporate and digital signage applications.

## The difference is Vision...

### Support

#### Warranty

All our products have a lifetime warranty to give you peace of mind about their reliability. When we say we are totally focused on delivering reliable products, we mean it!

We benchmark our failure rates against competitors to make sure we are better. We'll also take back unopened stock you haven't used no matter how old.

### Knowledge

#### Connected to the market

The team at Vision have extensive on-site and technical experience so we produce products which solve real-world issues.

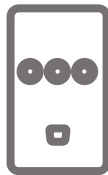

### Service

#### Specialist integrator services

We work in partnership with our integrators for large roll outs, providing demo kit, training for your sales team on new products and innovations and samples for you to test in installations.

Get in touch with our distribution partners to buy Vision products or speak with us at [www.visionaudiovisual.com](http://www.visionaudiovisual.com) @VisionAV on Twitter or chat to the team on LinkedIn.

## Faceplates

Vision's flagship faceplate is Techconnect, a versatile modular audio-visual faceplate, allowing seamless integration of connectivity, audio and control.

## Extenders

HDMI senders, splitters and wireless transmitters to effortlessly transmit your images and audio.

## Cables

Robust cable options for every imaginable requirement. We engineer cables with a focus on construction, consistency and integrity.

## Audio

A selection of active and passive loudspeakers designed for meeting spaces and education applications, and two Vision amplifiers.

## Mounts

Floor stands, projector mounts, desk mounts and bracketry designed for the world's leading audio visual displays.

## Media player

Vision's Media Players use Intel® processors and are full-powered in tiny space saving enclosures. Each model has bespoke input and output options.
