Techconnect is a modular audio-visual faceplate family engineered especially for AV installers. A "surround" fits to a backbox (or "mudring" if your wall is hollow), then the modules fix in place to complete the installation.
For 99% of professional AV installations the same set of modules are required, so Vision offer a simple package that contains a basic selection of modules as a starting point. Just select the length of the cable package you need to go with it
**Comes with your choice of complementary Cable Lengths**

**3m (9 ft)**   **5m (16 ft)**   **10m (33 ft)**   **15m (49 ft)**

Matt White
Pure white with a chiselled profile, Techconnect3 also has 11 mm of flat space above and below the connectors for information or company branding stickers.
Screw-In Modules
The modules have a tab that hooks into the surround at the bottom, then a couple of turns of the pre-installed screws locks the modules into place.

Stronger
Techconnect3 has shorter modules and extra ribbing to reduce module flex. On parts where flex is desirable to avoid shattering ABS plastic is used.

Improved Fit and Finish
Techconnect3 has more space behind the modules stash cables, and narrower and more even gaps between modules.
